DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3,4,9,10 & 14 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2002-106988. The Japanese Patent describes an invention on a heat pump hot water supply apparatus using carbon dioxide cooling medium and comprising: an internal heat exchanger (13), a compressed cooling medium with a primary compressing element (11a) is primarily heat released by a first radiator (12a), the primarily heat released medium is secondarily compressed with a latter compressing element (11b), the secondarily heat released cooling medium is secondarily heat released with a second radiator (12b), the secondarily heat released cooling medium is decompressed with an expansion valve (14), then passed through an evaporator (15) and returned to the primary compression device (11a) and furthermore the second radiator (12b) is heat exchanged with a return cooling medium flowed out from said evaporator (see figure 1).

Allowable Subject Matter

Claims 15-22 are allowed over the prior art of record.

Claims 5-8, 11-13 and 23-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 3-24 have been considered but are moot in view of the new ground(s) of rejection.
